Dear Hiring Manager,

I am interested in the Merchant Risk Analytics position at Affirm. I hold a B.A. in Economics and bring experience in financial analysis, compliance review, and quantitative modeling.

As an Insurance and Financial Analysis Intern, I analyzed financial data to evaluate risk exposure and regulatory trends and built reports supporting compliance initiatives. In managing insurance billing operations, I maintained documentation controls, reviewed claims accuracy, and resolved discrepancies, strengthening my understanding of operational risk and internal controls. My academic training in econometrics developed strong analytical foundations. I built regression models, conducted diagnostic testing, and interpreted results to support data driven decision making. I am proficient in SQL, R, Stata, and Excel, and I use AI assisted tools to improve analysis and workflow efficiency. I am currently preparing for the Certified Fraud Examiner designation to deepen my expertise in fraud detection and risk management. Affirm's focus on scalable merchant risk monitoring and transparent credit aligns closely with my interests and analytical background.

Thank you for your consideration.

Sincerely,

Meilin Sheik
